Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 10, and 16 – are rejected under 35 U.S.C. 102(b) as being anticipated by Laplante (5,065,557).

Laplante discloses an apparatus for holding a plurality of solar cell units (col. 3, line 48) that are plate shaped, comprising:

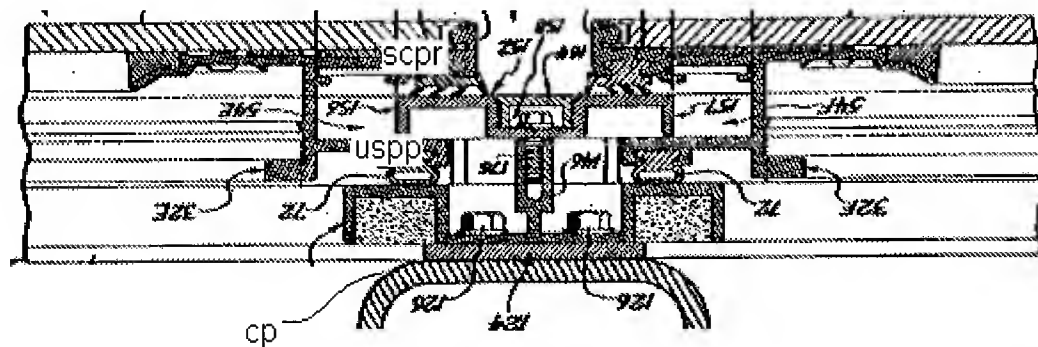

Claims 9 and 16 – roof mount fixture (30) capable of being fixed onto a roof;
a mounting member (122) configured to be fixed to the roof mount fixture and including at least one side plate (portion between 30 and 126);
modules (152); and

a frame member (32) including to-be-sandwiched portions (tbs) configured to be sandwiched and fixed between the mounting member and the modules, and unit supporting portions (40, 42) configured to support ends of the solar cell units, wherein the frame member includes projection plane regions (scpr, uspp) configured to project the solar cell units and the unit supporting portions directly underneath, the to-be-sandwiched portions are positioned inside the projection plane regions, and the roof

mount fixture includes a convex portion (cp) that contacts (via the shim, 124) the at least one side plate of the mounting member from an inner side of the at least one side plate for preventing deformation of the mounting member.

Claim 10 - The frame member includes a groove (g) in which a first end of the solar cell unit is fitted, a downward extending portion (de) that bends and extends downward from any one of a middle and an end of a lower plate (lp) of the groove almost perpendicularly to the lower plate, and the to-be-sandwiched portion projects sideward from the downward extending portion.

Allowable Subject Matter

Claims 11-14 are allowed.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
